CAIRN FOUNDATION

ABOUT

Cairn Foundation (erstwhile Cairn Enterprise Centre) is a society registered under the Haryana Registration & Regulation of Societies Act, 2012. The primary purpose of the organization is to serve the development needs of the communities around Cairn's operational areas in India. Since its inception in 2010, the NGO has been implementing small projects Rajasthan, Gujarat and Andhra Pradesh.

OBJECTIVES

- i. To promote and assist in Social Development.
- ii. To partner with community in regard to the following areas of CSR focus-
 - Skills Training: CCoE Jodhpur ; CEC Barmer
 - Safe Drinking Water Project
 - Health Initiatives
 - Farm-based program and Agri NRM
- iii. To assist the communities towards self-reliance, unity and awareness of their social rights, duties and responsibilities through spread of education and awareness.
- iv. To assist communities in skills development, to focus on the younger generation to provide training and equip them for improved employment, self-employment and overall financial independence.

BACKGROUND

Cairn Foundation (erstwhile Cairn Enterprise Centre) is a registered not-for-profit society promoted by Cairn Oil & Gas, subsidiary of Vedanta Limited. The purpose of the organization is to serve the development needs of the communities around Cairn's operational areas in India. It works in the Western part of Rajasthan i.e. in the surrounding villages of RJON Oilfield of Barmer district in Rajasthan which is also one of the most deprived districts in terms of various indicators

like- agricultural (due to being arid and desert region with almost nil rainfall), health (high salt/mineral prone area with minimal government intervention in health), sanitation (less education/awareness and civic sense), education (farthest location with no educational infrastructure or proper teaching staff in place), etc. hence adversely impacting its financial and social status. People are dependent on the seasonal rainfall for agriculture and migrating to other cities to work. Of late, with the discovery of Oil, gas and lignite in Barmer, there has been some remarkable industrial development which has led to immense development in area. Cairn Foundation is further adding value to the district needs as well.

GOVERNING STRUCTURE

Cairn Foundation is entrusted with the responsibility of reviewing all the programmes of Cairn CSR. It is also responsible for guiding changes if any, evaluating and approving the new initiatives that are to be implemented through the society.

In order to effectively implement the bye-laws of the society, the following structure has been laid out:

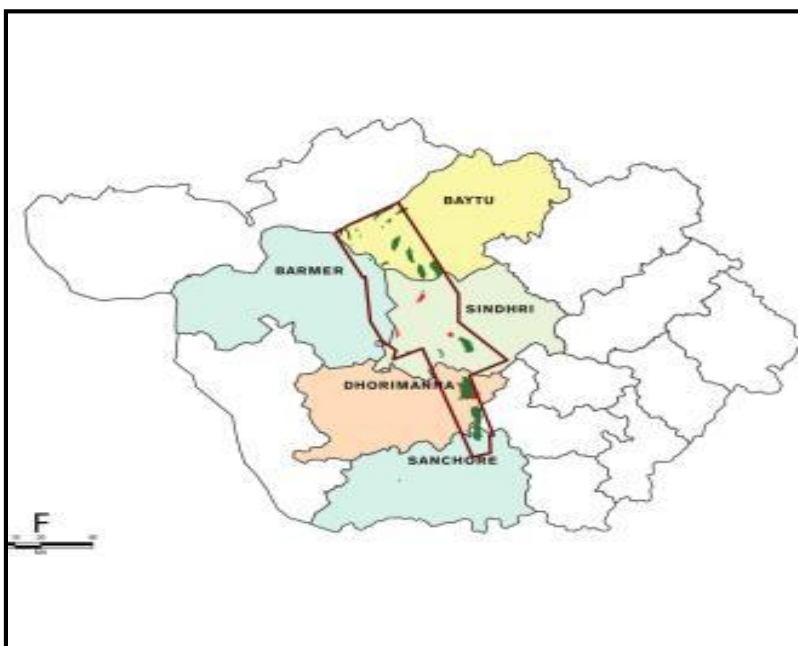

- a. Governing Body meeting at least once a quarter, as laid down in the MoA.
- b. Annual General Body Meeting conducted within six months from the closing of the Financial Year.
- c. A detailed agenda plan along with the last minutes of meeting is shared with the committee for making these meetings effective.
- d. A detailed action plan and activities undertaken are shared in the subsequent meeting.

AREA OF OPERATION

RAJASTHAN

The Barmer district of Rajasthan where Cairn operates has been at the pivot of its oil and gas explorations and production. To provide context, Barmer has 3 major oil reserves namely Mangala, Bhagyam and Aishwariya, along with Saraswati and Raageshwari being minor oil reserves. Mangala was discovered in January, 2004 and at the site total of 148 development wells have been drilled and completed with 96 producers and 33 injectors operationalized. It is the largest onshore oil discovery in India in more than a decade. Mangala, Bhagyam and Aishwariya fields, the three major discoveries in the Rajasthan block, together, have a gross hydrocarbons initially-in-place of about 2.2 billion barrels of oil equivalent. Apart from the oil reserves, Cairn has discovered Raageshwari deep gas field, which is meant to supply gas to meet the energy requirements at the MPT and the Mangala Development Pipeline, which runs approximately 670 km from Barmer to Viramgam to Salaya and then on to Bhogat, near Jamnagar, on the Arabian Sea coast.

Map: Geographical Representation of our area of operation in Barmer district

Our CSR projects are centered in the vicinity of our operational area and aim at alleviating the socio-economic status of Barmer district. The district with a Human Development Index (HDI) of 0.58 and population of 2.6 million is fraught with multiple issues due to which it is one of the

remotest and most socio-economically backward locations in India. It is characterized with a harsh climate, scarcity of potable drinking water, frequent droughts, lack of job opportunities and infrastructure, backward status of women, low level of health and education standards and high infant & maternal mortality rates. The objective of Cairn CSR is to target these issues and ensure sustainable and inclusive development in Cairn's area of operation to get endorsement and support from the community. At present, the impact has directly reached 144 villages.

GEOGRAPHICAL REACH TABLE

S.NO.	Name of Program	Direct	Indirect	Total
1	RACHNA	60000	2, 50,000	310000

OUR PROJECTS

JEEVAN AMRIT YOJANA:

SAFE DRINKING WATER PROJECT

OUR PROJECT AT A GLANCE:

‘Jeevan Amrit Yojana’ is the intervention of Cairn Oil & Gas vertical of Vedanta Limited, for providing safe drinking water to the community in Barmer where Cairn operates. CSR programmes at Cairn have been conceptualized to reach the grassroots of the community and propel it towards all round development. Jeevan Amrit caters to the same by making provision for safe drinking water through installation of RO plants which continually supply purified drinking water. Through this Yojana we attempt to do our best to help people exercise their fundamental right i.e. Human Right to Water and Sanitation (HRWS).

A still from one of the Jeevan Amrit RO plants.

BACKGROUND AND CONTEXT

The Barmer district of Rajasthan is geographically divided into 8 blocks namely Balotra, Barmer, Baytu, Chohtan, Dhorimanna, Sheo, Siwana, and Sindhari. The district as a whole forms parts of the Great Indian Thar desert by the virtue of which it experiences harsh and arid type of climate. In Barmer, almost 90% of the total annual rainfall is received during the southwest monsoon, which enters the district in the first week of July and withdraws in the mid of September. For the people of Barmer this short span of rainfall is the only time in the year to collect and harvest rainwater for drinking purposes. However, the rainwater supply does not last more than a quarter of the year and for the remainder, the people again have to resort to drinking unpotable and high TDS (>5000ppm) water. It is also important to highlight that even though the '*tanka*' (underground structure where rainwater is stored) water has low TDS but it does not qualify as fit for consumption as due to storage over months it accumulates biological impurities and becomes a breeding ground for water borne diseases.

Given the paucity of drinking water, Cairn driven by its commitment to sustainable growth has planned a major CSR intervention named 'Jeevan Amrit' project in collaboration with the PHED, Govt of Rajasthan, to ensure safe drinking water to the communities in the districts of Barmer through the establishment of RO water plants.

FUNCTIONING AND STATUS

The initiative involves setting up of 330 small scale RO plants (1000 lph, 2000 lph and 3000 lph) over the next 3 years to provide safe drinking water to a large number of people. Under the 1st Phase of Jeevan Amrit so far we have successfully installed 71 RO units impacting more than 1 lac community members of Barmer district since 2015. The 2nd phase of the project is in progress and through the Hub and Spoke's model Cairn has been successfully addressing the issue of high TDS water. The impact of the RO project in alleviating the quality of life in Barmer has been established in the form of more than 30,000 water cans sold on an average per week. Moreover, the health benefits from this project has proven to reduce cases of diarrhea and joint pain.

Our partners in this endeavor are Waterlife and Fontus, who aid the installation and commissioning of RO plants. Cairn CSR and partner agencies work as a team to spread awareness around safe drinking water through:

- Information, Education and Communication (IEC activities)
- Appointing people from within the community as RO plant operators so that they can be the harbingers of change.

The IEC activities involve “door to door” communication and community centric awareness programmes so as to increase the number of beneficiaries through personal and community based dialogues. These activities have proved beneficial in pushing the periphery of our programme by engaging more and more community members.

A still from “door to door” campaigning organized by our Partner Agency.

Pictures from our community based IEC programmes.

OUR IMPACT (FY 2016-17)

Sl. No	Indicators	Data
1	Total number of beneficiaries as registered customers regularly taking water from RO plants	102,000 people
2	Sales from Fontus RO plants	2,106,150 liters
3	Sales from Waterlife plants	2,556,970 liters
4	No. of plants run on entrepreneurial basis	6 plants
5	No. of women operators	6

“HAPPINESS AND HEALTH FOR ALL”

SKILLS TRAINING: IMPACTING EMPLOYMENT AND LIVELIHOODS IN RURAL RAJASTHAN

Trainees attending a practical session during training

BACKGROUND

Cairn in partnership with Dept. of Technical Education, Govt. of Rajasthan and ILFS skills currently runs Cairn Enterprise Centre (CEC). The primary objective of the institute is to build capacity among local youth through skill training and link them with employment – whether it is through a job or enterprise. The Centre offers a number of job-linked vocational skills training across educational qualification and aspirational level.

The general vocational trades offered in this center are masonry, electrician, mobile repairing and CNC machine operator training. In the service sector the institute offers training courses in computer operations and banking (in partnership with other specialized training providers). CEC also runs Satellite Centers in selected villages. The Satellite Centers mostly offer training for self-employment in the masonry trade.

The operational mechanism with which Cairn provides skill development and livelihood enhancement is both institutional and community-based. CEC Barmer and CEC Sanchore are the two major institutions in Barmer and Jalore district, while we have highly reputed establishment in the form of Cairn Centre of Excellence (CCoE) in Jodhpur.

IMPACT CREATED IN SPECIFIC CENTRES

CEC (BARMER AND SANCHORE)

A still of students at CEC

Over the FY year 2016-17, CEC Barmer has facilitated skill development of 873 local youths in 9 trades. In addition to providing quality training through multimedia content and NSDC certified vocational trainers, placement of 785 trained youths has also been ensured with reputed employers. Following is a table with the figures for the FY 2016-17 for CEC Barmer and Sanchore:

CEC BARMER

S. No.	Course Title	No. of Students Trained	No of students placed
1.	Certificate Programme for Machining Technician	51	51
2	Certificate Programme for Auto Service Technician	93	84
3	Certificate Programme for Computer Operator	99	75
4	Certificate Programme for Electrician	127	109
5	Certificate Programme for Industrial Electrician	16	16
6	Certificate Programme for Helper Mason	364	364
7	Certificate Programme for Plumber (General Helper)	21	18
8	Certificate Programme for Solar PV Technician	29	10
9	Handset Repair Engineer (Level II)	73	58

CEC SANCHORE

S. No.	Course Title	Course Brief/ Description	No. of Students Trained	Training Partner
1.	Certificate Programme for Computer Operator	Basic Computer Operator Course	84	IL&FS
2	Certificate Programme for Basic Electrician	Basic Electrician - useful at household as well as industry level	93	IL&FS
3	Handset Repair Engineer (Level II)	Mobile Handset Repairing Course	99	IL&FS
4	Submersible Pump Repairing and Motor Winding		70	IL&FS

SATELLITE CENTRES

Women in their practical training session in a Satellite Centre

Over the FY 2016-17, we have operated around 13 satellite centres with a focus on making livelihood enhancement and skill development accessible to remote locations, especially in the border areas. Following is a tabular representation of the numbers and figures associated with our satellite skill development centres for the trade of Masonry for FY 2016-17:

Course Start Date	Enrolment	Placed Trainees
4-Apr-16	20	18
3-May-16	17	13
6-Jun-16	21	17
13-Jun-16	30	22
16-Jun-16	21	15
31-Jan-17	29	24

31-Jan-17	29	25
25-Feb-17	30	16
27-Feb-17	20	11
27-Feb-17	30	26
28-Feb-17	29	23
21-Mar-17	19	10
21-Mar-17	29	22

CCOE JODHPUR

Over the years, the success that we achieved through the skill development activities through CEC led us to go one step further and facilitate advanced vocational skill development through the setting up Cairn Centre of Excellence (CCoE) Jodhpur. CCoE Jodhpur is a flagship CSR initiative providing state-of-the-art vocational training in Jodhpur, Rajasthan. We have engaged the internationally renowned certification agency and training service provider, TUV Rheinland, Germany to deliver training courses at this institute.

CCoE currently delivers courses in Welding (Basic and Advanced), Renewable Energy (including modules on wind and solar), ASDC Certified Automobile Repair & Maintenance (Basic and Advanced), Retail (accredited through Retail Association of India). All courses are strengthened with extensive training on soft skills and modules on English, Computer, Safety aspects etc. The entire facility has been certified as a Green Building with 'GOLD' rating under the LEED criteria.

IMPACT

CCoE Jodhpur has trained close to 700 youths hailing from all parts of Rajasthan since its inception. From the placement perspective, more than 500 youths have been facilitated and are currently working in reputed companies such as Suzlon, Vodafone, Amazon, PepperTap, Samsung, Minda, Hero Group, SBI etc. CCoE has also been repeatedly awarded with the

COMMUNITY ENGAGEMENT AND MOBILIZATION

The impact of any project is reflected in the community with regard to support and participation. The Skill Development Project works in close contact with the community by means of organizing mobilization camps in the form of Rozgaar Raths and Rozgaar Shivirs. Most of the new applicants at CEC and other institutions are gathered via these mobilization activities. In FY 2016-17, following mobilization activities were conducted:

SNo	Type of Mobilization	Time Period	Area	Impact
1	Rozgaar Rath	April 2016	Barmer and Sanchore	105 Villages
2		May 2016	Bhadka and Neemal	15 Villages
3		June 2016	Sanchore, Raniwada and Cheetalwada	30 villages
4	Rozgaar Mela	April 2016	Barmer	44 Persons
5		August 2016	Barmer	105 Persons
6		September 2016	Barmer	54 Persons
7		October 2016	Balotra and Barmer	12 Persons
8		December 2016	Barmer	42 Persons
9		February 2017	Ramsar	120 Persons
10		February 2017	Gadra Road	100 Persons

As per the data in the preceding table, our mobilization activities have directly impacted more than 500 Persons in terms of new applications and has covered a geographical dimension of more than 150 Villages in Western Rajasthan.

STORIES OF SUCCESS

HARIYA DEVI'S STORY OF EMPOWERMENT

For Hariya Devi and other inhabitants of Bhojariya, quality of life was poor and fraught with challenges. Hariya Devi (aged 35) and her husband were confronted with severe economic inadequacies, due to which they could not imagine the possibility of educating their daughter, Magi Kumari (aged 19.) Survival in this desert-based and border area ecosystem meant hard labour in the agricultural lands of well-off farmers. Hariya Devi's story of empowerment began when she walked into one of the several community engagement and mobilization activities of the Skill Development Project, conducted by Cairn. At this particular juncture, the discussion was about conducting a Masonry Course to increase the skill quotient and employability factors of the community. Hariya Devi was enthused and registered herself and her daughter in the course despite having faced opposition from her family and her socio-cultural background, which denied women the

opportunities for financial independence in non-traditional roles and overall empowerment. Cairn team fully supported her decision and provided quality training inclusive of theory, practical and on-the-job training components. After having received training on masonry and construction work, Hariya Devi and her daughter not only took the initiative of constructing a toilet in their own house within a short span of forty days, but are also supporting the village and other nearby areas to build toilets and other construction-related work. As a result of being professionally qualified due to Cairn's skilling programme, her wages have increased from INR 300 to INR 450 per day. Hariya Devi takes pride in her work and says happily that she and her daughter easily have 15-20 days of earning in a month. This is a huge step forward for Hariya Devi as she now has an income of her own, while also ensuring that her daughter is financially self-sufficient to a large extent. Hariya Devi has broken several barriers in transforming herself into a professional while also enabling her daughter to follow her footsteps. Moreover, she has also been a change-maker and facilitator for increasing awareness about safe sanitation practices in her village. Now, she is respected in her family and in her village and receives encouragement in all aspects of her life. As for us, her empowerment and strength is a symbol of true success, and an example to set for all our CSR initiatives.

IMPACT AT A GLANCE

The 2016-17 Financial year has yielded positive results in the Skill Sector of our commitment to the community and to CSR.

- We have successfully trained 2644 trainees across various trades and institutions in Barmer, Santhore and Jodhpur.
- We have been running satellite centres in rural areas of Rajasthan with a key focus on the Border areas in so as to make employability and skill development accessible in remote locations.
- We have hosted a large number of community events and programmes with relevant stakeholders and contributors for the effective quality enhancement of the teaching-learning process through our skill development projects.
- We have conducted over 10 Rozgaar Rathes and Rozgaar Camps in diverse geographical and socio-cultural contexts to ensure that our project is not limited to our institutions.

Students at a Training Engagement Activity Session

Having worked relentlessly and dedicatedly to empower the local youth to gain employability and widen the diversity of livelihoods in our project area, we look forward to sustain as well as expand these efforts for a brighter future.

BARMER UNNATI

(NATURAL RESOURCE

MANAGEMENT/AGRICULTURE PROJECT)

BACKGROUND AND CONTEXT:

There are around 50,000 families residing in the rural villages near our area of operation, out of which 80% earn their livelihood from farm based activities. Due to low productivity of agriculture, these families earn approximately Rs. 40,000 / year (less than the minimum wage). Therefore, every family wants a job in Cairn or related companies for sustainable livelihood. We work on vocational skill training to provide employment opportunities to youth (1000 per year). However, since jobs are much less related to people living in poverty, it creates dependency on us. Therefore, we use farm based initiative to create sustainable income for large section of people. This farm-based livelihood project was started in August 2013. The project focuses on improving farm based livelihood opportunities for farmers of three blocks of Barmer District (Baitu, Dhorimanna and Barmer).

To implement the project we partnered with BAIF. The project is for a period of five years (2013 – 2018) with year-on-year renewal. Agri-based initiative was launched to:-

1. Promote an alternate to people other than industrial work and avoid creating dependency on Cairn.
2. Engage with large section of people around our operational areas in a meaningful way.
3. Potential to change the socio-economic status of the whole area. We expect that 100 crores worth of incremental income will be generated annually with much smaller investment having a very good ROI. Besides, this will distribute prosperity and income to the larger section not just people getting employment at Cairn or its contractors.

4. Address the critical issues of water which is relevant environmentally as well as socially in an area like Barmer.

Pictures from our Wadis with beneficiaries of the project

OUR IMPACT AND INITIATIVES

The project began in the year 2013 with an objective to uplift the marginalized & impoverished farmers of Barmer. The program comprises of components such as construction of *Wadi* wherein farmers are given fruit saplings & trained on using effective farming techniques, developing Community Water Harvesting resource called *Nadi* which not only fulfilled the requirements of the community members but also enhanced the biodiversity around the area.

- As of now, against the target of 1000 Wadis, 854 have been developed and 5 Nadis have been renovated.
- With the aim to retain rain water in the cultivated land, 470 *Khadins* have been constructed against the target of 500.
- 50 hectares of Grazing land has been developed so far against the target of 100 hectares.
- Under Mukhya Mantri Jal Swavlamban Abhiyan (MJSA), 53 *Wadi*, 15 *Khadin*, 20 Hectares Grazing Land & Rain Water Harvesting in 4 schools have been completed.
- Over 2000 farmers have been trained to develop their skills.

Towards Barmer's development: Barmer Unnati

HEALTH INITIATIVES

BACKGROUND

Given the grim situation of Health facilities in Barmer district, Cairn has developed an integrated health intervention for improving the health standards of the communities it operates in. The three fold intervention is as follows –

Primary Health care services at door step – through MHV Cairn provides the basic primary health care facilities at a minimal cost of Rs 2 per year, where a van equipped with General Physician, Pharmacist, ANM, Driver & Coordinator reaches out to the remotest locations on a fixed schedule.

This initiative helps us to address the concerns at the door steps as well as saves the opportunity cost for traveling to the nearest medical care unit which is ~50-60kms in many cases.

Supporting district hospitals by providing doctors as well as sanitation intervention – while MHV caters to the basic needs to primary healthcare, it is well understood that a provision of specialized doctors in the district is paramount to address the needs of the community. Thereby, Cairn has provided 3 doctors in the district hospital which on an average caters to 30k OPDs per month. The referral services of MHV thus has a perfect synch with this intervention.

Strengthening the Govt. health delivery system – through RACHNA project – which focus on bringing awareness about the issues of Maternal & Child Health through mass media and inter personal counselling. The program also extended support to ICDS & Health Department in regularization of MCH services. It also focuses on capacity building of frontline health workers to promote menstrual health and hygiene. Besides, the program also promoted gender equity by sensitizing men and boys on MCH with focus on equitable roles & responsibilities. Therefore through this integrated approach, in FY16-17 we have been able to touch ~5 lacs people through health intervention.

HEALTH PROJECT: IMPACT TABLE

	Project Name	Agency Name	One time/Ongoing	Objectives/Deliverables in the form of no of beneficiaries,		How do we demonstrate that we have achieved objective like provided computer skills to n no of people, whether	Benefit company got

AWARDS AND ACCOLADES

In the Financial Year 2016-17, Cairn's CSR Projects have received recognition from a variety of sources. We at Cairn are committed towards our endeavors of improving the socio-economic status of the communities we operate in. Based on the last years efforts made for changing lives, some recognitions on external platforms have helped us to continue the good work with the mantra of "Can Do Spirit" at Cairn. Following is a list of awards that we have won in FY 2016-17:

List of Awards - CSR (2016-17)		
Sr. No.	Awards/Accolades	Area
1.	PetroTech Award – Sustainability and CSR for Jeevan Amrit project	Water
2.	Best CSR Practice Award 2016	Water and Skill project
3.	CSR Excellence Award for Skill Initiative – Bureaucracy Today	Skill Project
4.	India CSR Award – for Jeevan Amrit Project	Water
5.	Bronze Plate Award for the Commendable Contribution to the Elder Cause through HelpAge India	MHV Project
6.	CSR impact award in India CSR summit	NRM project
7.	Gold award for CSR Brochure–Annual Corporate Collateral award-2017 (PRCI)	CSR Projects
8.	Two Limca Book of record	Water Project
9.	Global CSR Award 2016	Water project
10.	Appreciation Certificate from District Administration, Barmer	Water Project
